

INDEX TO REGISTRATION TOWN NAMES (other than Kremenets)

from the Kremenets Vital Records
Dr. Ronald D. Doctor, Co-Coordinator, Kremenets Shtetl CO-OP
rondoctor@earthlink.net
26 March 2004

This Index lists town names that appear in the Kremenets vital records as “registration towns”. The table is in two parts. The first part identifies the records that appear for each town. The second part gives the distance and direction of the town from Kremenets. The list currently contains 97 different town names.

In the first part, the “Source” column gives the last two digits of the LDS microfilm in which each record is found, the type of record, and the year of the record. For example, “60B1870” indicates the record is from microfilm 2086060; it is an 1870 birth (B) record. An 1893 death record on microfilm 2086063 would be coded as 63D1893. The “Location in Source” column identifies the record in which the town name appears. For example, Baramel, the Source is 60B1871 and the town is mentioned in records F51, M9, and M40, the 51st Female Birth, the 9th Male Birth, and the 40th Male Birth, respectively, in the 1871 Birth records on LDS microfilm 2086060.

Town names in English follow the JewishGen ShtetlSeeker “Conventional” form, if available, or the “Native” form in the absence of a Conventional form. The Conventional form is the form “approved by the US Board of Geographical Names (BGN) for use with or instead of the local native name. These names are normally the common English name for a town.” The Native form is the “local official name form approved for use within the US Government by the BGN”. These forms usually differ from the form that appears in the vital records.

Occasionally the BGN forms are so different from the name in the vital records that the two cannot be recognized as the same town. In this case, the form as it appears in the vital records is in parentheses following the BGN form. In some cases, there are many towns with similar names and it is difficult to identify the town to which the vital record refers. We usually have selected the town geographically closest to Kremenets. If significant doubt remains, we have indicated that doubt with a question mark following the BGN name.
